

PROJECT LEADERSHIP AND TEAM BUILDING

Project Leadership and Team Building

Class Length: 5 Days

PDU : 25

Category: Project Management

Program Objectives:

By the end of the program, participants will be able to:

- Gain insight into your personal leadership style and strengths - and build on these for increased confidence and enhanced performance
- Acquire knowledge of best practice and leadership models, and equip yourself with essential leadership strategies and practical tools and techniques
- Discover how to influence, negotiate and lead through others, including leading through diversity and through teams

Synopsis /Course Benefits

To ensure project success, project managers must be leaders who identify and meet team needs in order to achieve project objectives. In this course, you transition to a leader who can inspire a diverse team to work together and deliver customer success. At the end of your classroom experience, you take away a project leadership best practices handbook and a personal development plan for use back at the office.

Who Should Attend

- High-middle to senior managers working from a wide range of geographical, cultural and organizational backgrounds, will benefit from this program.
- Participants may come from a broad range of backgrounds, including business development, human resources, operations, technology, finance, marketing, and sales.

ISO 9001: 2008 Reg. No: 660772
